Can be Reset only with a Claymate
Reset Box.

More detail...

The Claymate Clubman allows a low cost first step to securing your ground against loss of target revenue, howsoever caused.

With fewer features than a full blown Sporting Claymate, the Clubman is nonetheless a powerful Controller in a hand carried unit that Shooters plug in as required.

The 2 metres of super flexible cable provide a considerable degree of movement.

(Other lengths to order)

Throw targets immediately or, after a 3 second Solo Shooter Delay.

Throw Singles, Pairs, Following pairs from either trap, or from the same trap.

A 2.5 second trap cycle timer prevents launching (or counting) a trap that is not ready.

Dedicated trapping staff are not required for a ground to operate to its full potential.

The Counter records all targets launched and 'locks out' at 1000 targets in case the unit fails to be returned after a shoot. (Other Lock Out values to order)

High 'pre-owned' value allows easy transition to Full Blown Claymate Systems.

Tough Rubber Boot resists day-to-day knocks and is virtually 'cartridge bag proof'.
