# Claymate

**ISSF Skeet Claymate**  
Skeet, DTL or Double Rise Controller  
for one or two traps.

## Main Features

From a single target to a squad of more than 10 guns, the Skeet Claymate does it better.

Superior to coin or token systems.

Equally at home powering a Skeet range, DTL, Double Rise or any single/double trap discipline.

Co-site Skeet and DTL type fields using an Overlay Box.

Solo Shooter Friendly with audible countdown.

Compatible with the major brand of acoustic release.

Standard 50 metre handset with custom lengths to order.

2 metre trap cables. Waterproof connectors available.

Wall mounting included.

Non volatile audit counter to 10 million targets.

Stuck Button detection.

Secure and fraud proof.

## More detail...

Shoot Skeet or 'Trap' disciplines on your own or in groups.

Intelligent Trap detection allows the unit to operate a single trap on either of the 2 control outputs. It will even complain if it cannot 'see' any traps at all.

Single button handsets are available for dedicated DTL style disciplines.

Acoustic control is achieved simply by replacing the handset with the output from the acoustic system and letting Claymate fire the trap. (Dedicated Canterbury interface available).

Built in ISU (random 2.75 seconds) and DTL (random 1 second) delays if required.

Credit feature to allow groups of shooters with their own counters to pay for their own targets. Once targets have been recorded, the Counter can be removed and Claymate will release targets until the cache is empty.

Up to 3 show birds can be added for every 25 targets credited.

ISSF lamp outputs and a Low Target Warning are some of the features available. These may require a specific Claymate Power Supply Unit. Ask for details.

Without a valid counter, the Claymate cannot launch targets yet it remains 'active' to button presses and will even detect stuck buttons and issue a distinctive warning.
